KAIROS

AN INVITATION TO BUILD WHAT COMES NEXT

Dear Prospective Partner,
The next generation of technology leaders is already asking important questions: How can AI address real needs? How can we build safer digital systems? What can decentralized technology make possible? And how do bold ideas become products that matter?

KAIROS is a national-level, 48-hour offline hackathon designed to give college students the space to answer those questions through action. Organized by the AWS Student Builder Group at Sathyabama Institute of Science and Technology (SIST), KAIROS brings together student developers, designers, problem-solvers, and aspiring entrepreneurs to build solutions for real-world challenges.
We invite forward-thinking organizations to partner with KAIROS - not simply to support a competition, but to help create a high-energy environment where emerging talent can learn, collaborate, experiment, and demonstrate what they can build.

KAIROS at a Glance

Event	KAIROS - National Level Hackathon
Format	48-hour, in-person hackathon
Participants	College students competing in teams of four
Challenge areas	Artificial Intelligence, Cybersecurity, Web3, and other emerging technology domains
Competition	Progressive, round-wise elimination format
Recognition	Cash prizes and category awards, including Best Overall, Best Design, and Best Pitch
Organizer	AWS Student Builder Group at Sathyabama Institute of Science and Technology (SIST)
Event date and venue	To be announced by the organizing team

Why KAIROS Exists

We believe student potential grows when knowledge meets meaningful challenges.

KAIROS is built to move beyond theoretical exercises and encourage real-world problem solving. Within 48 hours, teams will be challenged to identify a need, develop a solution, make practical trade-offs, and communicate the value of what they have created.

The event is designed to recognize innovation as a complete process, not only technical execution, but also product thinking, design, clarity of presentation, and the ambition to take an idea further. By encouraging a startup-oriented mindset, KAIROS aims to nurture the next generation of builders and founders.

Why Partner With KAIROS?

Connect with emerging technical talent

Engage with motivated college students working across software development, AI, security, product design, and other fast-evolving disciplines. KAIROS offers a setting in which participants demonstrate how they approach problems, collaborate, and translate ideas into working concepts.

Drive the innovation conversation

Associate your organization with a student-led initiative centered on creativity, applied technology, and solving meaningful challenges. Sponsorship can create opportunities for recognition across approved event communications and on-ground experiences.

Contribute expertise, not just funding

Support student learning by proposing practical challenges, contributing technical resources, or nominating subject-matter experts for approved mentoring or evaluation roles. Your perspective can help participants connect their projects to industry realities.

Champion the skills that make products succeed

KAIROS includes recognition for excellence beyond the overall winning team, such as Best Design and Best Pitch. Partners can help celebrate the combined importance of engineering, usability, communication, and entrepreneurial thinking.

Partnership Opportunities

We welcome financial sponsorship, technology and infrastructure support, prize sponsorship, and in-kind contributions. Partnership models can be tailored to your organization's goals, subject to a mutually agreed scope.

PARTNERSHIP PATHWAY	ILLUSTRATIVE OPPORTUNITY
Presenting Partner	Lead event association and prominent recognition across agreed KAIROS materials and on-site touchpoints.
Technology or Track Partner	Support a relevant technology domain, contribute approved challenge resources or tools, and explore expert participation.
Awards Partner	Sponsor an award such as Best Overall, Best Design, or Best Pitch, with agreed recognition tied to the category.
Innovation & Experience Partner	Support participant essentials such as infrastructure, connectivity, refreshments, learning resources, or event experiences.
Community / Ecosystem Partner	Help amplify the initiative and foster connections across the student innovation ecosystem.

Sponsorship contributions and benefits are customized. No tier pricing, category exclusivity, audience guarantees, or benefits are confirmed until agreed in writing.

Illustrative Sponsor Benefits

Depending on the partnership type and agreed scope, opportunities may include:

- **Brand visibility:** Logo placement on approved event web pages, promotional creatives, and on-site branding placements.
- **Event acknowledgment:** Sponsor mention during agreed opening, award, or closing moments.
- **Thought leadership:** Opportunities to contribute an approved keynote, mentoring session, workshop, or technical perspective.
- **Technology engagement:** An approved problem statement, product demonstration, tool credits, or technical challenge aligned with the event.
- **Student connection:** Opt-in networking and interaction with participating teams, subject to event policy and participant consent.
- **Award association:** Recognition as the supporting partner of an agreed prize or achievement category.
- **Post-event visibility:** A mutually agreed event recap and available, verifiable highlights of sponsored activities.

All visibility, speaking slots, branding placements, data access, and other deliverables are proposals not guaranteed entitlements and require organizer approval, feasibility review, and a written partnership agreement.

What Your Support Can Make Possible

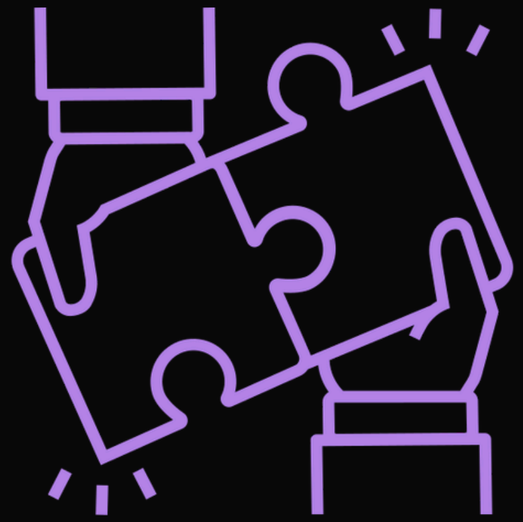

Your support can directly strengthen the student experience and help the organizing team deliver a high-quality event. Depending on the partnership, contributions may support:

- **Cash prizes** recognizing outstanding teams and category winners.
- **Technical infrastructure** such as development tools, cloud credits, APIs, internet connectivity, or equipment.
- **Participant experience** including food, refreshments, materials, and on-site essentials.
- **Learning and exposure** through mentorship, expert sessions, and access to practical industry perspectives.
- **Event delivery** including production, signage, awards, and operational needs.

Our goal is to direct sponsorship toward a meaningful, well-run innovation experience while giving each partner a clear and appropriate opportunity to participate.

A Collaboration Built on Shared Value

KAIROS is a meeting point between student ambition and the organizations helping shape the technology landscape. We see sponsorship as a collaboration: partners bring resources, experience, and perspective; students bring curiosity, energy, and original approaches to real problems.

Together, we can help turn 48 hours of focused building into lasting inspiration for the next generation of innovators.

Frequently Asked Questions for Partners

01

Who is organizing KAIROS?

KAIROS is organized by the AWS Student Builder Group at Sathyabama Institute of Science and Technology (SIST). This identifies the campus student organizing community; it does not indicate corporate sponsorship by Amazon Web Services.

02

What makes this event distinct?

KAIROS combines a 48-hour in-person build experience, real-world problem statements, emerging technology domains, progressive elimination rounds, and recognition for design and pitching as well as the overall solution.

03

What kinds of sponsorship are welcome?

Financial sponsorship, category prizes, technology credits and tools, technical expertise, and in-kind support for event delivery can all be considered. The team will tailor the scope to the partner's objectives and event needs.

04

How many students will attend, and what reach can sponsors expect?

Final participant capacity, selection numbers, and promotional reach figures have not yet been announced. The organizing team can share verified projections or confirmed numbers when available; we will not present unverified estimates as commitments.

05

Can partners interact with or recruit students?

Potential engagement formats include approved demos, technical sessions, and opt-in networking. Any recruitment-related activity or access to participant information must follow event policies, consent requirements, and a separate agreement.

06

How are sponsorship benefits and commitments finalized?

The organizing team will agree on the contribution, deliverables, schedule, logo permissions, and any applicable conditions in writing before confirming a partnership.
